

## ABOUT CALIMA CANARIAS

Calima Canarias is an independent, non-profit service providing up-to-date information on calima episodes and air quality in the Canary Islands and mainland Spain. It aggregates open data from AEMET, Copernicus Atmosphere Monitoring Service, Open-Meteo, the Gobierno de Canarias and other official sources, presenting it through indices, maps and location-based forecasts. It has no affiliation with any official body or commercial activity.

Independent, non-profit project. No data is sold, no advertising is displayed, and there is no affiliation with official bodies, political parties or industry companies.

## KEY FACTS
